GENERAL MISCELLANEOUS.

Subject No. 290.

His Highness the Yuvaraja.

Mr. E. R. George, Kolar Mining Board.
„ Graham Anderson, C.I.E.

Summary of discussion.—Express congratulations on the complete recovery of His Highness the Yuvaraj.

Note.—The Members were thanked.

Subject No. 291.

Mysore Fish and Game Preservation Regulation.

Mr. Graham Anderson, C.I.E.

Summary of discussion.—Expresses congratulations to Government for introducing the "Mysore Fish and Game Preservation Regulation".

The member read the * following note on the subject (* Appendix D. 3.)

Reply of Government.—We are quite willing to take advantage of wise measure which will be introduced by the Government of India, and in the meanwhile we will enforce our own rules.

Subject No. 292.

Protection from annoyance caused by the Military people.

Mr. Javali Angadi Basappa of Bangalore Taluk.

Summary of discussion.—The Military people in their practcies of Field Firing do not confine themselves to defined areas but run horses and troops on all sorts of lands in private holding and cause trouble to people and cattle and damage to crops. The villagers are often forced to evacuate their houses for days together when they are subjected to great worry and anxiety in having to remove even women under confinement. And often damage to their crops is also being done. Pray that people may be protected from such troubles.

Withdrawn.

Subject No. 293.

Enlistment of volunteers in the Military force.

Mr. Nadig Sivappa, Sorab Taluk.

Summary of discussion.—There are many people in this country who are in the enjoyment of Inams granted to them in consideration of services rendered by them and by their ancestors in the Military Department under the present and former Governments. They have no means of learning their family professions. The descendants of their people should be enlisted as volunteers in the Military force and be trained in the profession of their ancestors.

Reply of Government.—Noted.

Subject No. 294.

Adoption of measures to check the growth of Lantana bush.

Mr. A. Ramanna,
„ Sonnegowda,
„ Srinivasa Rao.

Summary of discussion.—Lantana bush (ಸೀಮೆ ಮುಳ್ಳು) has been evidently spreading to the prejudice of other useful shrubs. A lot of fertilizing properties are taken away from the earth and much labour and time will be necessary to have the land cleared. In order to arrest its spread and growth in other parts, it is proposed that necessary measures be adopted immediately.

Mr. Ramanna said that many villages in the Hassan Taluk had become *bechirakh* being overgrown with Lantana.

Mr. C. Srinivasa Rao said that hedges should not be formed of Lantana.

Mr. Graham Anderson also spoke:—"It is most desirable that every possible encouragement should be given to persons who are prepared to take up Lantana land.
